KRUPANIDHI GROUP OF INSTITUTIONS VALUE ADDED COURSE: INTERVIEW SKILLS

SYLLABUS

Duration of the Course: 30 hrs

OBJECTIVES:

This course is designed to improve students' interview skills. Throughout the semester students will create and conduct effective interviews and respond coherently to interview questions in face-to-face settings. Since good communication skills help further one's career, every effort will be made to increase the students' awareness of appropriate professional techniques in responding to interview questions and presenting themselves in a public setting. Voice and articulation will be stressed, as well as listening skills. Appropriate interview questions and formatting will also be an important area of focus.

ORAL COMMUNICATION: Students shall be able to respond coherently to interviewers' questions. They will understand the power of speech and will respond with appropriate language, articulation, pitch, inflection, and nonverbal behaviours to enhance their self-presentation goals.

LISTENING: Students shall develop and/or improve listening skills.

1. An introduction of oneself to the class; Students will have three minutes to tell the class something about themselves that makes them unique.
2. one-on-one interviews; and a team project involving a panel discussion. Students will participate in interviews as interviewer or interviewee and then switch roles. Students work in dyads for one-on-one interviews.
3. Written assignments include two analyses of email writing and a topic paper on any aspect of the interview process that the student finds interesting or worthy of further research and exploration.
4. Mock Interview from Industry experts.

KRUPANIDHI GROUP OF INSTITUTIONS CERTIFICATE COURSE: SIX SIGMA GREEN BELT SYLLABUS

Duration - 30 Hrs

- The course on Six-Sigma will focus on detailed strategic and operational issues of process improvement and variation reduction. Six-sigma is a measure of quality that strives for near perfection. It is a disciplined, data-driven approach for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process-from manufacturing to transactional and from product to service.
- A Six-sigma defect is anything outside of customer specifications. To be tagged Six Sigma, a process must not produce more than 3.4 defects per million opportunities.
- Six-sigma employs a systematic approach of DMAIC (Define, Measure, Analyse, Improve and Control) for the process improvement. This course will provide a detailed understanding on various issues specific to each phase of DMAIC.
- The course is designed with a practical orientation and includes cases, industry examples and MINITAB software applications.
- The course is designed to satisfy the need of both industry professionals and University students.
- The content is beneficial to both manufacturing and service industry.

KRUPANIDHI GROUP OF INSTITUTIONS VALUE ADDED COURSE: INTERVIEW SKILLS

SYLLABUS

Duration of the Course: 30 hrs

OBJECTIVES:

This course is designed to improve students' interview skills. Throughout the semester students will create and conduct effective interviews and respond coherently to interview questions in face-to-face settings. Since good communication skills help further one's career, every effort will be made to increase the students' awareness of appropriate professional techniques in responding to interview questions and presenting themselves in a public setting. Voice and articulation will be stressed, as well as listening skills. Appropriate interview questions and formatting will also be an important area of focus.

ORAL COMMUNICATION: Students shall be able to respond coherently to interviewers' questions. They will understand the power of speech and will respond with appropriate language, articulation, pitch, inflection, and nonverbal behaviours to enhance their self-presentation goals.

LISTENING: Students shall develop and/or improve listening skills.

1. An introduction of oneself to the class; Students will have three minutes to tell the class something about themselves that makes them unique.

2. one-on-one interviews; and a team project involving a panel discussion. Students will participate in interviews as interviewer or interviewee and then switch roles. Students work in dyads for one-on-one interviews.

3. Written assignments include two analyses of email writing and a topic paper on any aspect of the interview process that the student finds interesting or worthy of further research and exploration.

4. Mock Interview from Industry experts.

VALUE ADDED COURSE: GST & FILING OF GST RETURN
SYLLABUS

Duration: 32 Hrs

GST is known as the Goods and Services Tax. It is an indirect tax which has replaced many indirect taxes in India such as the excise duty, VAT, services tax, etc. The Goods and Service Tax Act was passed in the Parliament on 29th March 2017 and came into effect on 1st July 2017. It is levied on the supply of goods and services. Goods and Services Tax Law in India is a **comprehensive, multi-stage, destination-based tax** that is levied on every **value addition**. GST is a single domestic indirect tax law for the entire country.

VALUE ADDED COURSE: DATA ANALYTICS USING SPSS

SYLLABUS

DURATION: 30 Hrs

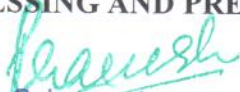

Data Analytics is the science of analyzing data to convert information to useful knowledge. This knowledge could help us to understand our world better, and enable us to make better decisions. This course seeks to present students with a wide range of data analytic techniques and is structured around the broad contours of the different types of data analytics, namely, descriptive, inferential, predictive, and prescriptive analytics

Learning Objectives: Upon successfully completing this course, using SPSS software, students will be able to

- Learn to create, save and edit datasets
- Use data to perform exploratory data analysis for continuous and dichotomous variables
- Recognize the distinction between and appropriate uses of correlation and regression.
- To perform Z-tests for differences in group means
- To understand the appropriate use of paired and unpaired t-tests and the interpretation of the resulting data output
- To perform a chi-squared test and compute confidence intervals for differences in group proportions
- To understand the appropriate use of chi-squared and ANOVA tests and the interpretation.

CERTIFICATE COURSE: SIX SIGMA GREEN BELT SYLLABUS

Duration - 30 Hrs

- The course on Six-Sigma will focus on detailed strategic and operational issues of process improvement and variation reduction. Six-sigma is a measure of quality that strives for near perfection. It is a disciplined, data-driven approach for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process-from manufacturing to transactional and from product to service.
- A Six-sigma defect is anything outside of customer specifications. To be tagged Six Sigma, a process must not produce more than 3.4 defects per million opportunities.
- Six-sigma employs a systematic approach of DMAIC (Define, Measure, Analyse, Improve and Control) for the process improvement. This course will provide a detailed understanding on various issues specific to each phase of DMAIC.
- The course is designed with a practical orientation and includes cases, industry examples and MINITAB software applications.
- The course is designed to satisfy the need of both industry professionals and University students.
- The content is beneficial to both manufacturing and service industry.

KRUPANIDHI GROUP OF INSTITUTIONS VALUE ADDED COURSE: INTERVIEW SKILLS

SYLLABUS

Duration of the Course: 30 hrs

OBJECTIVES:

This course is designed to improve students' interview skills. Throughout the semester students will create and conduct effective interviews and respond coherently to interview questions in face-to-face settings. Since good communication skills help further one's career, every effort will be made to increase the students' awareness of appropriate professional techniques in responding to interview questions and presenting themselves in a public setting. Voice and articulation will be stressed, as well as listening skills. Appropriate interview questions and formatting will also be an important area of focus.

ORAL COMMUNICATION: Students shall be able to respond coherently to interviewers' questions. They will understand the power of speech and will respond with appropriate language, articulation, pitch, inflection, and nonverbal behaviours to enhance their self-presentation goals.

LISTENING: Students shall develop and/or improve listening skills.

1. An introduction of oneself to the class; Students will have three minutes to tell the class something about themselves that makes them unique.

2. one-on-one interviews; and a team project involving a panel discussion. Students will participate in interviews as interviewer or interviewee and then switch roles. Students work in dyads for one-on-one interviews.

3. Written assignments include two analyses of email writing and a topic paper on any aspect of the interview process that the student finds interesting or worthy of further research and exploration.

4. Mock Interview from Industry experts.

This will include an introduction describing the interviewee, the company for which she or he works, and his or her title. It will also include the questions the student asked and an analysis of the interviewee's responses. These reports/interviews will be presented to the class orally and to the placement Department in writing.

Course Syllabus

Module 1: Preparing for the Job Interview How you should prepare for a job interview, find out about companies, overcome nerves, decide which clothes to wear, vocabulary about your hard and soft skills, and answering questions using the STAR technique.

Module 2: Answering Interview Questions Avoiding mistakes during the interview, tips to help you answer questions effectively and confidently, understanding the importance of non-verbal communication during interviews, and the importance of intonation.

Module 3: Responding to Challenging Interview Questions Answering those challenging interview questions, being able to stand out during interviews, providing diplomatic answers to questions you would prefer had not been asked and giving yourself time to come up with an answer, and stressing key words in your replies.

Module 4: Closing the Job Interview Effectively, Post Interview and Online Interviews Considering the questions that you, the interviewee should ask, or not ask, deciding what you should do, or not do at the end of the interview, and after the interview, and discovering how online interviews are similar and different to face to face interviews.

SIX SIGMA GREEN BELT CERTIFICATION SYLLABUSES

- The course on Six-Sigma will focus on detailed strategic and operational issues of process improvement and variation reduction. Six-sigma is a measure of quality that strives for near perfection. It is a disciplined, data-driven approach for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process- from manufacturing to transactional and from product to service.
- A Six-sigma defect is anything outside of customer specifications. To be tagged Six Sigma, a process must not produce more than 3.4 defects per million opportunities.
- Six-sigma employs a systematic approach of DMAIC (Define, Measure, Analyse, Improve and Control) for the process improvement. This course will provide a detailed understanding on various issues specific to each phase of DMAIC.
- The course is designed with a practical orientation and includes cases, industry examples and MINITAB software applications.
- The course is designed to satisfy the need of both industry professionals and University students.
- The content is beneficial to both manufacturing and service industry.

COURSE LAYOUT

Module 1: 5 hours

- Course Outline and Expectation setting.
- Introduction to Quality Management.
- Understanding of Basic Statistics
- Understanding Statistical Meaning of Sigma.
- Understand Lean and Six-Sigma
- Six Sigma Organization and Roles
- Different levels of certification and selecting 'Belts'

Module 2: 5 hours

- Six Sigma Methodologies
- DMAIC
- DMADV, IDDOV
- DFSS
- Six Sigma Goals and Metrics
- Benchmarking.
- DMAIC Tools and Applications
- Lean Tools and Application
- Tools used in Define Phase
- Project Charter,
- Pareto Analysis and
- TPM
- Case Study and Work Outs for all the Tools.

- DPMO, DPU, RTY
- Histogram,
- Process Map,
- SIPOC,
- Process Capability Study,
- Measurement Scales-Discrete and
- Continuous Data
- MSE

Case Study and Work Outs for all the Tools.

Module 4: 5 hours

Tools used in Analyze Phase

- C & E Diagram
- RCA,
- QFD,
- Box Plot,
- Dot Plot,
- Probability Charts
- 5S
- Correlation/Regression Analysis
- Case Study and Work Outs

Module 5: 5 hours

- Introduction to Hypothesis Testing
- Introduction to ANOVA/DOE
- Tools used in Improve Phase
- Solution Selection Matrix,
- Category Importance Weight
- Case Study and Work Outs for all the Tools.

FMEA

KRUPANIDHI GROUP OF INSTITUTIONS VALUE ADDED COURSE: INTERVIEW SKILLS

SYLLABUS

Duration of the Course: 30 hrs

OBJECTIVES:

This course is designed to improve students' interview skills. Throughout the semester students will create and conduct effective interviews and respond coherently to interview questions in face-to-face settings. Since good communication skills help further one's career, every effort will be made to increase the students' awareness of appropriate professional techniques in responding to interview questions and presenting themselves in a public setting. Voice and articulation will be stressed, as well as listening skills. Appropriate interview questions and formatting will also be an important area of focus.

ORAL COMMUNICATION: Students shall be able to respond coherently to interviewers' questions. They will understand the power of speech and will respond with appropriate language, articulation, pitch, inflection, and nonverbal behaviours to enhance their self-presentation goals.

LISTENING: Students shall develop and/or improve listening skills.

1. An introduction of oneself to the class; Students will have three minutes to tell the class something about themselves that makes them unique.
2. one-on-one interviews; and a team project involving a panel discussion. Students will participate in interviews as interviewer or interviewee and then switch roles. Students work in dyads for one-on-one interviews.
3. Written assignments include two analyses of email writing and a topic paper on any aspect of the interview process that the student finds interesting or worthy of further research and exploration.
4. Mock Interview from Industry experts.

This will include an introduction describing the interviewee, the company for which she or he works, and his or her title. It will also include the questions the student asked and an analysis of the interviewee's responses. These reports/interviews will be presented to the class orally and to the placement Department in writing.

Course Syllabus

Module 1: Preparing for the Job Interview How you should prepare for a job interview, find out about companies, overcome nerves, decide which clothes to wear, vocabulary about your hard and soft skills, and answering questions using the STAR technique.

Module 2: Answering Interview Questions Avoiding mistakes during the interview, tips to help you answer questions effectively and confidently, understanding the importance of non-verbal communication during interviews, and the importance of intonation.

Module 3: Responding to Challenging Interview Questions Answering those challenging interview questions, being able to stand out during interviews, providing diplomatic answers to questions you would prefer had not been asked and giving yourself time to come up with an answer, and stressing key words in your replies.

Module 4: Closing the Job Interview Effectively, Post Interview and Online Interviews Considering the questions that you, the interviewee should ask, or not ask, deciding what you should do, or not do at the end of the interview, and after the interview, and discovering how online interviews are similar and different to face to face interviews.

SIX SIGMA GREEN BELT CERTIFICATION SYLLABUSES

- The course on Six-Sigma will focus on detailed strategic and operational issues of process improvement and variation reduction. Six-sigma is a measure of quality that strives for near perfection. It is a disciplined, data-driven approach for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process- from manufacturing to transactional and from product to service.
- A Six-sigma defect is anything outside of customer specifications. To be tagged Six Sigma, a process must not produce more than 3.4 defects per million opportunities.
- Six-sigma employs a systematic approach of DMAIC (Define, Measure, Analyse, Improve and Control) for the process improvement. This course will provide a detailed understanding on various issues specific to each phase of DMAIC.
- The course is designed with a practical orientation and includes cases, industry examples and MINITAB software applications.
- The course is designed to satisfy the need of both industry professionals and University students.
- The content is beneficial to both manufacturing and service industry.

KRUPANIDHI GROUP OF INSTITUTIONS VALUE ADDED COURSE: INTERVIEW SKILLS

SYLLABUS

Duration of the Course: 30 hrs

OBJECTIVES:

This course is designed to improve students' interview skills. Throughout the semester students will create and conduct effective interviews and respond coherently to interview questions in face-to-face settings. Since good communication skills help further one's career, every effort will be made to increase the students' awareness of appropriate professional techniques in responding to interview questions and presenting themselves in a public setting. Voice and articulation will be stressed, as well as listening skills. Appropriate interview questions and formatting will also be an important area of focus.

ORAL COMMUNICATION: Students shall be able to respond coherently to interviewers' questions. They will understand the power of speech and will respond with appropriate language, articulation, pitch, inflection, and nonverbal behaviours to enhance their self-presentation goals.

LISTENING: Students shall develop and/or improve listening skills.

1. An introduction of oneself to the class; Students will have three minutes to tell the class something about themselves that makes them unique.

2. one-on-one interviews; and a team project involving a panel discussion. Students will participate in interviews as interviewer or interviewee and then switch roles. Students work in dyads for one-on-one interviews.

3. Written assignments include two analyses of email writing and a topic paper on any aspect of the interview process that the student finds interesting or worthy of further research and exploration.

4. Mock Interview from Industry experts.

This will include an introduction describing the interviewee, the company for which she or he works, and his or her title. It will also include the questions the student asked and an analysis of the interviewee's responses. These reports/interviews will be presented to the class orally and to the placement Department in writing.

Course Syllabus

Module 1: Preparing for the Job Interview How you should prepare for a job interview, find out about companies, overcome nerves, decide which clothes to wear, vocabulary about your hard and soft skills, and answering questions using the STAR technique.

Module 2: Answering Interview Questions Avoiding mistakes during the interview, tips to help you answer questions effectively and confidently, understanding the importance of non-verbal communication during interviews, and the importance of intonation.

Module 3: Responding to Challenging Interview Questions Answering those challenging interview questions, being able to stand out during interviews, providing diplomatic answers to questions you would prefer had not been asked and giving yourself time to come up with an answer, and stressing key words in your replies.

Module 4: Closing the Job Interview Effectively, Post Interview and Online Interviews Considering the questions that you, the interviewee should ask, or not ask, deciding what you should do, or not do at the end of the interview, and after the interview, and discovering how online interviews are similar and different to face to face interviews.
